Help Children with Stroke Parents

「風語橋」

Dear Speech Therapists,

This Augmentative and Alternative Communication aid 「風語橋中風人士親子溝通工具書」 has helped many children to communicate with their parents with aphasia. The tool fills the gap of our current practice of speech therapy by aiding stroke parents to resume communication with their children and thus re-engage their family roles. Research has already shown that this will eventually promote an optimal outcome of rehabilitation of the stroke parent.

All contents and pictures of the AAC-communication book 「風語橋中風人士親子溝通工具書」 are constructed by expert speech therapists, and a story with the same theme, 「風語橋」小說 was also written and illustrated by experienced speech therapists.

If you'd like to get hold this new AAC 「風語橋中風人士親子溝通工具書」, please send us an email to help.kids.w.strokeparents@gmail.com. We will send you for **free**. And while stock lasts, we will send the story 「風語橋」小說 together with the AAC.

-Lorinda KWAN, speech therapist, HKIEd-
